code or [click here](#)

HEE is developing routes to support and significantly increase the numbers of suitably experienced individuals to be recognised as educated to the level of an advanced practitioner and be eligible for inclusion on HEE's Advanced Practice Directory

HEE Faculty for Advancing Practice across the North west was formed in January 2021, with a vision that Advanced practitioners across the NW region are fit for 21st century care and that best use is made of their skills and expertise across an evolving health and social care system.

The Faculty for Advancing Practice and your Primary Care Training Hub are working collaboratively to ensure all nurses, AHPs and pharmacists currently working at an advanced level have the opportunity to be recognised by The Centre for Advancing Practice's directory.

This survey will enable us to understand the current primary care workforce who is identified as an advanced practitioner and how your experience and qualification/s meet with the multi-professional framework for advanced clinical practice for England.

We are aware that there may be a number of people working at an advanced level that have not completed a master's in advanced clinical practice and this survey will provide an opportunity to look at appropriate educational development opportunities to support you to be recognised by the Centre for Advancing Practice. Including:

- MSc Advanced Clinical Practice
- Supported e-portfolio route

HEE across the North West will continue to prioritise funding to support Primary Care advanced practitioners.
